## K2 TABLETED SALT

Treats water

K2 tableted salt is a professional solution for anyone who values quality and effectiveness in water treatment. This tableted salt for water softening is made of high-quality salt with a NaCl content of 99.90%, meets the strict requirements of the EN 973 standard and has a PZH certificate, guaranteeing safety and effectiveness of operation. Ideal as a regeneration salt for softeners, it effectively softens water, preventing scale formation and protecting installations from corrosion. The product is used both in households and in industry or gastronomy.

### Application:

- Water softeners
- Industrial dishwashers
- Car washes
- Swimming pools, laundries, power plants

### Product advantages:

- High purity: Guarantees efficient operation of water softeners.
- Versatile: Can be used in homes, industrial plants and catering establishments.
- Installation protection: Prevents scale formation, extending the life of your equipment.
- Better water quality: Reduces detergent consumption and improves cleaning efficiency.

## K2 ALOT

### FOR WASHING RIMS

K2 ALOT perfectly cleans wheels and steel and aluminum rims. Removes dirt caused by brake pad abrasion. It is a safe alkaline agent, and works as effectively as acidic agents. Does not cause corrosion in places where chips are on aluminum rims. Has a wide range of applications, works where other products fail. It is ideal as a means for washing tarpaulins, frames and chassis. It is also suitable for removing copolymer waxes.

- removes brake pad dust and road dirt
- alkaline product, does not contain acids
- safe for all types of rims and hubcaps

Depending on the degree of contamination	1:3 – 1:10
Tarpaulin washing with low-pressure spraying	1:5 – 1:10
